

MULTILIGHT Pro – LED lamps for clear and relaxed vision

SCHWEIZER's lamp range makes it easier and more comfortable to read, work or perform other tasks. Fitted with powerful yet energy-efficient LEDs, our innovative products help you improve your quality of life.

The MULTILIGHT Pro lamps are either available in one individually tested light temperature of your choice (warm white – 2700 K, neutral white – 4500 K or cool white – 6500 K) or with all three light temperatures. Thanks to two brightness levels, the light intensity can be individually adjusted for optimal illumination.

The perfect lamp for every situation

The innovative MULTILIGHT Pro LED lamp range by SCHWEIZER features numerous impressive details that help reduce eye strain for relaxed reading.

Sophisticated technology and maximum durability thanks to selected materials combined with an elegant design and intelligent functionality – **Made in Germany.**

SCHWEIZER – always the right choice

At home or on the go, for hobbies, leisure, and at work: SCHWEIZER magnification and visual devices for multiple applications improve the quality of everyday life.

MULTILIGHT Pro – Light colour in a striking design

Multiple studies have shown that the provision of appropriate, high-contrast lighting can significantly improve visual acuity.

An individually tested light temperature is more pleasant and improves visibility for reading or other close tasks noticeably. Optimised lighting can improve the visibility of details and thus restore the reading ability.

The MULTILIGHT Pro lamp range – functionality and design that delight.

Made in Germany

Design

- 7 different product versions for multiple applications
 - Table lamps
 - Floor lamps
 - Clamp lamps
- Black matte surface prevents irritating reflections
- Robust plastic housing facilitates cleaning
- Elegant and timeless design (durable due to the use of high-quality materials)
- Clearly arranged control panel in contrasting white

Functionality

- Maximum user comfort thanks to large, easy-to-operate locking levers
- Lamp head can be swivelled in any direction and even pulled right down to the table top
- Large central control panel
- Audible ON/OFF feedback
- Flexible positioning of lamp ensures optimal lighting while minimising glare
- Available in 3 light temperatures (warm white – 2700 K, neutral white – 4500 K and cool white – 6500 K)
- Foldable design for space-saving storage; standard arm versions also ideal for mobile use

Technology

- Low energy consumption and high performance thanks to the use of up to 14 durable LEDs
- Features the tried and tested LEDs of SCHWEIZER's illuminated magnifiers – no mixing of light temperatures
- 2 brightness levels (100% and 70%) for optimal lighting (no flickering)
- Lithium-ion battery with 4-hour operating time and 3-hour charging time
- Easy-to-recognise battery status
